TURNING BUILDINGS INTO EXPERIENCES

Perception is everything. Buildings that were once considered “drab” are today afforded cult status. Others, once thought of as modern and trendy, are today seen as “dated”. Tenancy rates and market values fluctuate accordingly. So it pays to make your building worth a visit – to turn it into an experience.

Facade resurfacing not only offers an unparalleled scope for creative expression, protective qualities and energy savings, it also comes at a fraction of the cost versus reglazing. No longer is it prohibitively expensive to stay relevant.

Your building will be a landmark that changes with the times.

Of course, the greatest benefit is your building’s new identity. Because perception is in the eye of the beholder.

MAKE A LASTING IMPRESSION

Facade resurfacing is the most cost effective solution to modernize your building. There's no need for compromises either. Our products are so hard-wearing; we've used them on everything from submarines to spaceships.

What's more, Spin Imaging makes conceptualisation, development and installation a smooth and quick process that does not disturb tenants. We liaise closely with architects, building owners and developers to ensure that the creative vision is realized. From initial testing through product development to factory-certified installation, we guarantee the highest quality product available.

For your building, the sky really is the limit.

» THE FACTS

The Benefits Of Facade Resurfacing

SPIN IMAGING

Specializing in advanced long-term solutions for all interior and exterior applications, Spin Imaging has been the world leader in custom large-format corporate branding for well over a decade. The reason is simple: in addition to our creative vision, we have the technical knowledge, skills and production facilities that are second to none.

An incredible amount has passed through the hands of the R&D team at Spin Imaging throughout the years. We have delivered on briefs covering everything from outer space to the depths of the Atlantic Ocean. Together with some of the most exciting and innovative companies in the world, such as Virgin Galactic, Coca Cola, Stratolaunch, Toyota, Mattel and Pepsi, we have pushed the boundaries of technology and creativity.

Designers, material specialists, aeronautical engineers, rocket scientists, astrophysicists, brand ambassadors and many others have worked as one on these projects. We have really brought out the best in each other. And that isn't very surprising, when you think about it.

More than anything, we all owe allegiance to our craft.
